

Injury Assessment Report

Date: 2025-08-12 14:57:52

Injury Type: Burn

Precautions:

- Immediately cool the burn by running it under cool (not cold) water for about 10 minutes.
- Do not apply ice, butter, oil, or toothpaste to the burned area.
- Remove any tight clothing, jewelry, or accessories before the area swells.
- After cooling, apply a soothing gel like aloe vera to reduce pain and inflammation.
- Cover the burn loosely with sterile gauze or a clean cloth to protect it.
- Do not pop any blisters and clean gently if they rupture on their own.

Recommended Medications:

- Take ibuprofen or acetaminophen to manage pain and reduce inflammation.
- Apply aloe vera gel to cool and hydrate the burned skin.
- Use over-the-counter antibiotic ointments like Neosporin on broken or blistered skin.
- Apply petroleum jelly to keep the wound moist and support healing.
- Use silver sulfadiazine cream as a prescription topical to prevent infection in moderate burns.
- Receive a tetanus booster if the burn is deep or contaminated and immunization is outdated.
